Windowmaker 2024 R1.7

General Enhancements

Sales Quotes/Orders Lists

The Sales Quotes/Orders Live/Complete/All Views now list only the 200 latest records by default instead of all the records. This should reduce the time to open these lists. The Filter Row can be used to search for record(s) based on one or more criteria. This will list all the records fulfilling the search criteria, even those excluded from the initial list.

Enhancements to Options

Link to Working Centre

When the Operation Position is specified using Windowmaker rules, the program now supports an unlimited number of operations on a profile, removing the previous limit of 12 operations. Additionally, now operations are correctly generated for spliced profiles.
