Windowmaker 2024 R1.8

Release Document

Windowmaker 2024 R1.8

General Enhancements

Excel-based Rules

Windowmaker Excel-based Rules are now enhanced to support:

- Glass BOM - lines that correspond to Glazing records set-up in Windowmaker. It supports shaped glazing for shapes supported by Windowmaker. The cost will be automatically calculated by Windowmaker. This can also be used to override the default glass size and shape parameters calculated by Windowmaker.
- Manual BOM lines – lines that do not correspond to parts or Glazing records set-up in Windowmaker. The size, quantity, position code, cost should be computed and set from the MS Excel file.

Enhancements to Options

Link to Saw

Windowmaker now links to Pertici 500 CNC Double Mitre Saw.

Issues Fixed

Manufacturing - Process - Link To Welders - 53606

Bottom profiles in a window frame were excluded from Welder links if they were mechanically joined. This is now fixed.

Administration - Tools - Move Records - 53937

The issue causing the program to crash when attempting to move Glazing while it is selected in Customer defaults has now been resolved.

Sales - Order Entry - 31511

When a glazing record was disallowed using Customer Special Terms and it has been used in rules condition of the System used to create a Sales line, Windowmaker gave an "invalid Glass" error. This is now corrected.

Sales - Order Entry - Sub Orders – 53150

Moving Sales Lines from one stage suborder to another caused a crash when the BOM 'Store From' status was greater than the first status. This is now fixed

Sales - Dealer Client – 53954

Option answers that were disallowed for dealers were still visible to them. This is now fixed.
